

Video Distribution

Twenty-first century schools use technology to drive efficiency, safety and improved teaching and learning. And while the past decade has seen dramatic changes in education technology both inside and outside the classroom, each advancement has typically brought with it a new system, new procedures and new challenges. CampusSV® software, from SchoolView Technologies, is a complete, scalable solution that consolidates management and control of diverse school technologies at the district, building and classroom level, on a single, comprehensive platform. SchoolView's network-based approach modernizes traditional bell, clock and PA systems, while addressing the management and control needs of classroom audio, video and presentation tools.

Video Delivery Control Module

Deliver streamed video directly to each classroom projector or flat panel. Mix various shared resources such as DVD players, Sat Receivers & Cable Boxes.

Remote Video Broadcast Module

Deliver a live broadcast from a mobile cart or a permanent studio to any and all classroom projectors and flat panel displays.

Video-On-Demand Module

Push and control archived video from our intuitive interface to any and all classroom projectors and flat panel displays. Using our Teacher's Client web interface, an instructor can pull and control video from a video server and send it directly to the classroom projector.

Available for CampusSV®

*Classroom Control Module required for control of headend video source equipment and VOD server.
