

Telephone Access

Twenty-first century schools use technology to drive efficiency, safety and improved teaching and learning. And while the past decade has seen dramatic changes in education technology both inside and outside the classroom, each advancement has typically brought with it a new system, new procedures and new challenges. CampusSV® software, from SchoolView Technologies, is a complete, scalable solution that consolidates management and control of diverse school technologies at the district, building and classroom level, on a single, comprehensive platform. SchoolView's network-based approach modernizes traditional bell, clock and PA systems, while addressing the management and control needs of classroom audio, video and presentation tools.

Enhanced Telephone Control Module

Available for both CampusSV® & CampusPA™, this module will provide a voice prompted menu system from any telephone or cell phone. With password protection, an administrator can trigger an MP3 bell, make live PA zone announcements, power on/off projectors, or trigger an emergency alert.

Available for CampusSV® and CampusPA™
